

# MSCP Rare Plant Monitoring Workshop

**Tuesday, March 1st • 9am – Noon • Mission Trails Visitor's Center, Conf. Room B**

The USFWS and CDFG are funding a grant to review existing MSCP monitoring data, objectives and protocols and make revision recommendations. Dr. Kathryn McEachern, Rare Plant Specialist with the U.S. Geological Survey's Biological Resources Division, will be the lead in this effort, supported by USGS staff and a three member Independent Scientific Advisory Group (not yet determined at this time).

The workshop is designed as an initial kick-off to give Dr. McEachern a chance to meet the stakeholders, hear their concerns, experiences and understand the data that is available on rare plants. The grant is intended to be a joint multi-jurisdictional effort with the City as the grant administrator.

Thank you in advance for your participation.

Please email [msjohnson@sandiego.gov](mailto:msjohnson@sandiego.gov) with any questions.

### Directions:

From Interstate 8, take the Mission Gorge/ Fairmount exit. Turn north onto Mission Gorge Road and proceed on Mission Gorge Road for 4.2 miles. Look for the large wooden park sign on Mission Gorge Road. Turn left onto Father Junipero Serra Trail. The Visitor and Interpretive Center parking lot is on the left just before you get to the pipe gate on Father Junipero Serra Trail.

From SR-52, take the Mast Blvd. exit and turn left onto Mast Blvd. Go under the freeway to the first traffic signal (West Hills Parkway) and turn right. Driving west, turn right onto Mast Blvd. then right onto West Hills Parkway. Take West Hills Parkway to Mission Gorge Road and turn right. Proceed down Mission Gorge Road 2.4 miles (past the Father Junipero Serra Trail entrance to Old Mission Dam and Kumeyaay Lake and Campground). Look for the large wooden park sign on Mission Gorge Road and turn right onto Father Junipero Serra Trail. The Visitor and Interpretive Center parking lot is on the left just before you get to the pipe gate on Father Junipero Serra Trail.
